

Sagar Debnath

Full Stack Developer

 sagardebnath1001@gmail.com

 9383270893

 Agartala, Tripura

 <https://www.linkedin.com/in/sagar-debnath-50410021a/>

Technical Skills

React

TypeScript

JavaScript

PHP

Python

MySQL

Mongo DB

Prisma DB

Tailwind CSS

Bootstrap

Node.js

Express.js

Next.js

REST APIs

GraphQL

Git

Docker

Professional Summary

Passionate Full Stack Developer with 1 year of experience building scalable web applications using modern technologies. Expertise in React, PHP, Python, and database management with a strong focus on clean code, performance optimization, and user experience. Proven track record of delivering high-quality solutions in agile environments and collaborating effectively with cross-functional teams.

Professional Experience

Junior Associate Developer

Calanjiyam Consultancies • Remote

November 2024 - Present

Maintained and enhanced client-facing applications by resolving critical backend and frontend issues, improving application stability and user experience

Developed comprehensive testing strategies by creating and executing test cases to identify bugs, reducing debugging time by streamlining issue detection processes

Education

B.Tech

National Institute of Technology
2025

Certifications

Scaler React Developer Certification

FreeCodeCamp Responsive
WebDesign Certification

FreeCodeCamp Javascript Algorithms
Certification

Frontend Developer Certification-
HackerRank

[Portfolio](#)

[Hacker Rank Profile](#)

[VGG19 Model prototype](#)

[Homchang](#)

[StayFind \(Under Development\)](#)

[Google Meet and Calendar API usage](#)

Implemented database schemas and queries in MySQL and Prisma DB, improving data retrieval efficiency by 35%

Collaborated with cross-functional teams to deliver timely solutions for production applications serving active client base

Led end-to-end development of comprehensive e-learning platform(Lotus Education) for Law course sales, from database design to deployment

Freelance Full Stack Developer

Homchang • Agartala

February 2024 - March 2024

Optimized application performance by identifying and resolving core codebase issues, enhancing dynamic data handling capabilities

Implemented cloud media management by integrating Cloudinary for seamless image upload functionality

Enhanced content creation workflow by developing custom Quill rich-text editor integration and custom components

Streamlined administrative processes by optimizing article creation/update flow on admin dashboard

Expanded platform functionality by adding video redirection, pagination system, and comprehensive UI improvements

Created a service to serve OG meta tags along with the url, enabling dynamic thumbnail title and images

Trainer (HTML/CSS, PHP)

Calanjiyam Consultancies and Technologies • Remote

May 2025 - Present

Delivered technical training to students on HTML/CSS fundamentals and PHP programming basics (Beginner to Intermediate levels)

Developed curriculum content focusing on web development best practices and practical implementation

Mentored aspiring developers in modern web development techniques and industry standards

Key Projects

StayFindr- Hotel or stay Booking platform

React • TypeScript • NodeJS • MongoDB • Tailwind CSS

2025

Set up user authentication and new user registration

Used OpenStreetMap to generate a map and used the coordinates entered for a listing to show in map or redirect the users to the map point

Complete with dashboard for admin and clients alike, the former will create listings and the latter will save and book listings when needed

Users can see amenities offered, can edit number of people, number of days and nights, and get a bill according to listing price

Searchbar with multiple options like location, price range, name etc.

Google Meet Creation Tool

React • NodeJS • MongoDB • Google Calendar API • Google Meet API

2023

Set Up Google OAuth2 authentication using node.js backend and google cloud console

Users can login through google and generate links

All available links will be visible in a list that users can join

Deep-learning CNN model for detecting Diabetic Retinopathy

Python • ResNet • VGG • Google Colab

2024-Present

Utilized APTOS 2019 dataset for Diabetic Retinopathy, applied multiple image preprocessing measures according to best practices

Gaussian Blur, GrayScale, CLAHE are a few of the preprocessing methods applied on the images

Custom layers were tried and tested with the model for best result possible

This is to facilitate the creation of an ensemble model with multiple models in hopes of achieving even better results

Lotus Education

HTML/CSS • PHP • Bootstrap • Ajax • Apex Charts

2024-Present

Took a leading role in creating interactive admin side dashboard for making law course and its sections, managing students, handling notifications, etc.

Uses PHP to create an LMS page locked under payment verification

Contact form messaging functionality was implemented

Designed the entire database, planned constraints and tested end to end

Additional Information

Languages: English (Fluent), Bengali (Native), Hindi(Fluent)

Interests: Tech blogging, Continuous learning, Problem-solving, Football, Video Games

Volunteer Work: Onsite help at Egaro Photo Festival and Travel
